Summary

Full-Stack Developer with hands-on experience building responsive web interfaces, backend services, and developer tools. Competent across multiple programming languages and database systems, with a strong focus on performance optimization, clean architecture, and practical software design.

Experience

DGymBook **Jun, 2026 – Present**
Full-Stack Developer *Remote*

- Contribute to an existing Hono and Bun monorepo backend with PostgreSQL, shipping features and fixes for a gym management platform's partner app, member app, and sales portal.
- Develop features for the Next.js admin panel and lightweight user-facing web flows, integrating with the core backend APIs.
- Work on scheduled cron jobs, background service workers, and the main application servers that automate recurring operations and offload long-running tasks.
- Collaborate through GitHub-based workflows, code reviews, and daily standups in a remote team.

Warewe Consultancy Pvt Ltd. **Aug, 2025 – Mar, 2026**
Frontend Developer Intern *Remote*

- Designed and developed an internal management tool using Express.js and Prisma ORM with a PostgreSQL backend, automating operational workflows and integrating full-stack capabilities.
- Independently owned and drove the development of critical product features, building reusable modular components using React, Next.js, and TypeScript with a high degree of autonomy.
- Engineered a headless CMS system utilizing WordPress and WPGraphQL, seamlessly consuming complex API endpoints via Next.js to decouple content management from presentation.
- Optimized Core Web Vitals and page speeds, achieving a 30% reduction in initial page load times through strategic code-splitting, asset optimization, and edge delivery practices.

Projects

Explore Kasaragod | *Next.js, TypeScript, Tailwind, PostgreSQL* **Live Project**

- Engineered a community-driven, ad-free digital directory and platform mapping local food, sights, and essential services for Kasaragod, focusing on web performance and zero-tracker privacy.
- Designed and optimized relational database schemas and location-based lookup queries utilizing Prisma ORM and PostgreSQL to ensure sub-100ms API response times.

RenderCard | *Next.js, Edge Runtime, Dynamic SVG Rendering* **Live Demo**

- Developed a high-performance, URL-based Open Graph (OG) image generation API allowing developers to render highly customizable social preview cards in real-time.
- Utilized Vercel Edge Runtime and globally distributed edge caching to achieve sub-millisecond API cold starts without external server overhead.
- Designed fully customizable card templates controlled dynamically via query string URL parameters.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Java, C++, PHP, Python, Go
Frameworks & Libs: React.js, Next.js, Node.js, Bun, Express.js, Hono, Tailwind CSS, HTML5, CSS3
Databases & Tooling: PostgreSQL, Redis, MongoDB, MySQL, Prisma/Drizzle ORM, REST APIs, GraphQL, Git, Vercel

Education

Srinivas University **Aug, 2022 – May, 2025**
Bachelor of Computer Applications - Software Development & Web Design (8.89 CGPA) *Mangalore, Karnataka*

Chemnad Jama'ath HSS **Jun, 2020 – May, 2022**
HSE/+2 Computer Science (86%) *Kasaragod, Kerala*
